

DIY Snow Globe

Supplies

Clear jelly jar - 10oz

Super Glue - Gorilla Glue works well

Glycerin

Water

Figurines

Glitter

Instructions

- Unscrew jelly jar top and glue bottom of figurines to inside of top.
 - Do this first so glue has enough time to set.
- While glue is setting:
 - Add in the glitter; not too much-you want to be able to see the flamingo!
 - Add a very small amount of glycerin. No more than a teaspoon really, just enough to slow down the glitter as it floats.
 - Add water to almost the top of the jar
- Make sure glue and figurines are dry-Then screw on the jar top **tight!!**
Glue it if you want to be extra cautious!
- Give it a shake!!!
