

*Apex Legends* by Respawn Entertainment

Reviewed by Julian

FPS shooter, battle royale

### **Give a summary without spoilers!**

A battle royale experience where you choose from 19 different characters, all with their own unique abilities, and team up with either one or two other players. Drop into a map with 60 other players, find guns, eliminate others, and try to be the last team standing.

### **What drew you to this game?**

It was the characters and storyline since most of it came from a series called Titanfall, but the game is completely separate from that series.

### **Did it remind you of something that you've previously played?**

It reminded me of Titanfall because all of the guns from that game are present in Apex Legends and all of the playable characters in Apex are all from different factions in the Titanfall universe.

### **To whom would you recommend this game?**

I would recommend Apex Legends to anyone that enjoys battle royale type games and the Titanfall series since the gameplay mechanics are very similar. The game is very violent but not very gorey and is very fast paced so you will never get bored of sitting around doing nothing.

### **Overall, did you like it and would you recommend it to others?**

I love this game and would highly recommend it to others because it is unique and different. I wouldn't recommend it to people that don't like fast paced gameplay and like to have the game played for them since you actually need to develop skill in this game.

### **Anything else that you would like to add to this review? What made you choose it? Did you like the cover? Was it recommended to you? Did you find it at the library?**

I started playing this game within the first week of its release.
