Stand Alone, Romance

Give a summary without spoilers!

Nathan Donelson is the biggest star in the NFL while Bree Camden is living out her dream of opening her own dance studio. The two have been stuck in the friend zone since high school. Neither of them know that both are secretly hiding romantic feelings for the other. After Bree gets herself into a sticky situation, the two best friends have to pretend to be a couple for a huge advertising deal. Nathan and Bree quickly realize that they can't hide their true feelings for each other any longer.

What drew you to this book?

I was drawn to this book because of the storyline of a dancer and a football player being in a relationship. It's a concept that I had never read in a book before and thought it would be interesting.

Did it remind you of something that you've previously read?

This book reminded me of the television series *Friday Night Lights*. Obviously both storylines involve football as a main concept but there is also romance included in both. The coach's daughter in *Friday Night Lights* is a dancer which made me think of this series while reading this book.

To whom would you recommend this book?

I think that this book would be great for someone who loves a good classic romance story with some plot twists involved as well. This book would also be perfect for anyone with an interest in anything football or dance related because both are main concepts of the book.

Overall, did you like it and would you recommend it to others?

I really enjoyed this book and would highly recommend it to others. It was very heartwarming and well written. It is a classic romance story but at the same time is not super predictable.

Anything else that you would like to add to this review? What made you choose it? Did you like the cover? Was it recommended to you? Did you find it at the library?

I chose to read this book because I had seen many people on social media reading it and recommending it so I thought I would give it a try.
